Defect Report: Basic Calculator

Generated 2026-10-21 22:12:59 | Bugs: 12 | Failed test cases (defect log): 125

ID	Build	Severity	Defect description	Ref. test case	Expected result	Actual result	Picture of actual result
BUG-01	Build 1	High	No numeric validation - text input is accepted and the answer shows NaN instead of the 'Number x is not a number' error (example input: Add: First='abc', Second='1', Integers only=No)	TC43, TC44, TC45, TC46, TC47, TC48, TC49, TC50 (8 failed test cases)	answer='' | error='Number 1 is not a number'	answer='NaN' | error=''	
BUG-02	Build 2	Critical	Add and Concatenate are swapped - Add joins the text (2 + 3 = 23) and ignores Integers only (example input: Add: First='2', Second='3', Integers only=No)	TC01, TC02, TC03, TC04, TC05, TC06, TC07, TC32, TC33, TC34, TC43, TC44, TC45, TC49, TC52, TC58 (16 failed test cases)	answer='5' | error=''	answer='23' | error=''	
BUG-03	Build 2	Critical	Add and Concatenate are swapped - Concatenate adds the numbers / returns NaN for text (example input: Concatenate: First='abc', Second='def', Integers only=No)	TC27, TC28, TC29, TC30, TC31 (5 failed test cases)	answer='abcdef' | error=''	answer='' | error='Number 1 is not a number'	

BUG-04	Build 3	Critical	Concatenate validates the inputs as numbers - text cannot be concatenated (example input: Concatenate: First='abc', Second='def', Integers only=No)	TC27, TC30, TC31 (3 failed test cases)	answer='abcdef' | error=''	answer='' | error='Number 1 is not a number'	
BUG-05	Build 3	High	Integers only checkbox stays enabled when Concatenate is selected (example input: Operation: Concatenate)	TC61 (1 failed test cases)	integers_checkbox=disabled	integers_checkbox=enabled	
BUG-06	Build 4	Critical	Answer is always rounded to an integer even when Integers only is not ticked (example input: Add: First='1.5', Second='2.25', Integers only=No)	TC06, TC19, TC20, TC21, TC23 (5 failed test cases)	answer='3.75' | error=''	answer='3' | error=''	

BUG-07	Build 4	Medium	Integers only checkbox is locked (disabled) for Add / Divide (example input: Operation: Add)	TC62, TC63 (2 failed test cases)	integers_checkbox=enabled	integers_checkbox=disabled	
BUG-08	Build 5	Medium	Clear button is disabled on a fresh page (example input: Fresh page (no calculation))	TC64 (1 failed test cases)	clear_button=enabled	clear_button=disabled	
BUG-09	Build 6	Critical	Divide by zero is not checked - Infinity / NaN is shown instead of the error message (example input: Divide: First='5', Second='0', Integers only=No)	TC25, TC26, TC42 (3 failed test cases)	answer='' | error='Divide by zero error!'	answer='Infinity' | error=''	

BUG-10	Build 7	Critical	First operand uses the previous answer instead of First number field (first calculation uses empty/0) (example input: Add: First='2', Second='3', Integers only=No)	TC01, TC02, TC03, TC05, TC06, TC07, TC08, TC09, TC11, TC12, TC13, TC14, TC15, TC17, TC18, TC19, TC20, TC21, TC23, TC24, TC27, TC28, TC29, TC31, TC32, TC33, TC34, TC35, TC36, TC37, TC38, TC39, TC41, TC43, TC45, TC46, TC48, TC49, TC58, TC59, TC60 (41 failed test cases)	answer='5' | error=''	answer='3' | error=''	
BUG-11	Build 8	Critical	First and Second number are swapped - order-dependent operations give wrong results and the validation message names the wrong field (example input: Subtract: First='5', Second='3', Integers only=No)	TC08, TC09, TC10, TC11, TC20, TC21, TC22, TC23, TC24, TC25, TC27, TC28, TC29, TC31, TC35, TC37, TC38, TC39, TC41, TC42, TC43, TC44, TC46, TC47, TC48, TC49, TC50, TC59 (28 failed test cases)	answer='2' | error=''	answer='-2' | error=''	
BUG-12	Build 9	Critical	Second number field and Calculate button vanish - no calculation can be performed (example input: Add: First='2', Second='3', Integers only=No)	TC01, TC02, TC03, TC04, TC05, TC06, TC07, TC08, TC09, TC10, TC11, TC12 (12 failed test cases)	answer='5' | error=''	Step failed: TimeoutError: locator.fill: Timeout 5000ms exceeded.
